

Important Announcement Regarding NY County Criminal History Searches

The Office of Court Administration in NY (OCA), the agency responsible for regulating criminal record access, has announced that effective July 14, 2003 county-by-county access to criminal history information is no longer available within several counties in the state of New York. In these counties criminal history information will be made available only as a statewide search. The statewide search fee is \$52.

In order to assist you in making appropriate ordering decisions, Ai has surveyed the 62 NY counties to determine if requestors must submit searches as statewide or county requests.

If you are ordering a county or counties where a statewide is not required in combination with counties that can only be accessed via a statewide search, the statewide search will suffice for all.

Please refer to the NY Public Access Fees web link located on our Resources page for ordering information. This matrix will be updated as changes occur. We encourage you to check our site often for updates.

Thank you.
